CLAIMS

- 1. Human anti-idiotypic antibody Fab or scFv fragment, characterized by the ability to mimic Her-2/neu tumor associated antigen.
- 2. The fragment of claim 1, that comprises a sequence SEQ ID No: 3 in the CDR3 region of the V_H domain and a sequence SEQ ID No: 4 in the CDR3 region of the V_L domain.
 - 3. The fragment of claim 1, that comprises a sequence SEQ ID No: 5 in the CDR3 region of the $V_{\rm H}$ domain and a sequence SEQ ID No: 6 in the CDR3 region of the $V_{\rm L}$ domain.
 - 4. The fragment of any of claims 1 to 3, which is directed against trastuzumab F(ab')₂.
 - 5. The fragment of claim 2, which comprises the aminoacid sequence SEQ ID No:1, this fragment being designated scFv 40.
- 6. The fragment of claim 3, which comprises the aminoacid sequence SEQ IDNo:2, this fragment being designated scFv 69.
 - 7. A multimer of the antibody fragment defined in any of claims 1 to 6.
 - 8. A pharmaceutical composition comprising an antibody fragment according to any of claims 1 to 6, or a multimer thereof according to claim 7, in association with a pharmaceutically acceptable carrier.
- 9. An ex vivo method for preparing antigen-presenting cells (APCs) useful for inducing Her-2/neu-specific protective antitumor immunicity, which method comprises contacting an antigen-presenting cell with an anti-idiotype antibody fragment according to any of claims 1 to 6.
 - 10. The method of claim 9, wherein the APC is a dendritic cell.
 - 11. An isolated APC prepared according to the method of claim 9 or 10.
 - 12. Use of an antibody fragment according to any of claims 1 to 6, or a multimer thereof according to claim 7, for the preparation of a medicament for the prevention or treatment of a tumor wherein Her-2/neu is overexpressed.
 - 13. Use of the APC of claim 11 for the prevention or treatment of a tumor wherein Her-2/neu is overexpressed.
 - 14. The use of claim 12 or 13, wherein the tumor is an adenocarcinoma.
 - 15. The use of claim 14, wherein the tumor is selected from breast cancer, ovary cancer, uterus cancer, stomach cancer and lung cancer.
